Completing the upgrade will link the already improved sections to provide drivers and freight from growth areas with better access to Melbourne’s freeway network.

Email  M80Upgrade@roads.vic.gov.au

We’re upgrading the remaining sections of the M80 Ring Road to deliver widening and improvements along 38 kilometres of freeway from the Princes Freeway, Laverton North through to the Greensborough Highway, Greensborough.

Three sections of the upgrade have been completed, with construction on the Sunshine Avenue to Calder Freeway section underway.

Construction is expected to begin on the first of three remaining sections in early 2018.

All sections will be complete by late 2021.

Project benefits
We’re adding more lanes in each direction to ease congestion, improving safety by reducing weaving and merging with an improved road layout and upgrades to key interchanges and installing a new freeway management system to improve traffic flow.
M80 Ring Road Upgrade
Project overview map

- **Calder Freeway to Sydney Road (11 km)**
  - Status: Complete, May 2013
- **Sydney Road to Edgars Road (4 km)**
